

Addendum Number 2

**Targeted Zoning & Subdivisions Code Update 2017-2018**

**Questions from RFP Respondents Including City Responses:**

**Question**

Regarding item 7 on page 5 of the RFP: Please clarify whether the list of public agency clients (to identify potential conflict of interests) with whom we are currently providing services is for all projects under contract or just planning and zoning-related work.

Similarly, regarding item 8 on page 6, should the list of public agencies for which we have previously provided services over the last 10 years address all services or just relevant planning and zoning-related projects?

On page 14, the RFP indicates that a project website is desired. As an option (for cost considerations), would the City consider a project-dedicated page on the City's website?

**Answer**

The City requests that Proposers provide a list of clients for which the Proposer is currently providing zoning code assistance.

The City requests that Proposers provide a list of public agencies for which the proposer has provided relevant zoning code assistance over the last 10 years.

The City does not have the resources to create and maintain a dedicated page on the current website and requests that Proposers provide a linked site that is not maintained by City Staff.
